

**IUPUC
OFFICE OF STUDENT
RESEARCH**

INDIANA UNIVERSITY-PURDUE UNIVERSITY
COLUMBUS

Application Procedures for Student Research Grants

The proposal and this form, signed and dated, should be submitted to Dr. Julie Goodspeed-Chadwick, Director of the Office of Student Research at IUPUC, at juligood@iupuc.edu as PDF files. **The deadlines for review are October 4, 2018 and February 1, 2019.**

Eligibility

- Students (or student teams) should occupy the roles of primary authors or investigators of the research projects and will receive credit as the primary author(s). Students must secure a faculty mentor(s) for each OSR project proposed.
- Students must be enrolled at least half-time (6 credits for undergraduates and 3 for graduate students) at IUPUC.
- Students must be in good standing with the university.

Considerations

- The faculty mentor is responsible for ensuring that the student follows the appropriate protocol for his or her research project (e.g., IRB approval and other risk precautions). If your research or conference will involve international student travel, the faculty mentor must speak with the IUPUI Office for International Affairs (<http://international.iupui.edu/about/contact.html>) and obtain the required IU authorization (see <http://abroad.iupui.edu/develop-program/steps-resources.html>) from the Overseas Study Advisory Council.
- The review committee will consider all types of projects proposed by students working in different disciplines and areas. Community-based projects that address the needs of the region are encouraged.
- Research funds must be used for costs related to the research project (i.e., materials and services) in accordance with university policies within the designated academic year. Purchase requests must be documented on the purchasing form and submitted to the Director of the Office of Student Research. Unspent funds remain with the Office of Student Research.
- Grants are non-renewable; however, students who have won grants in the past may reapply for a grant for a new project or for a project that is an extension of the previous project.

Proposals

- Students should create and attach a title, a narrative that addresses the purpose or significance (i.e., why the project is being pursued), objectives (i.e., what the project will accomplish), and plan (i.e., how the project will be completed) of the research project. The OSR Review Board appreciates the inclusion of a review of literature in the proposal.
- An anticipated budget for itemized expenses must be included. (Please note: A maximum amount of \$1,000 can be awarded to a single research project, whether sponsored by a single student or a student team. Please note that less than \$1,000 may be awarded.)
- A description or list of expected outcomes (i.e., what the results might look like) should be included.

- A plan for the presentation or dissemination of scholarship is expected and should be addressed in the proposal. (Note: IUPUC will organize an exhibition for students involved with the Office of Student Research to showcase their work. This exhibition will take place at the end of the spring semester.)
- The potential impact of the research on communities outside of IUPUC should be indicated in the proposal.
- A recommendation letter from the faculty mentor should accompany the proposal. Faculty mentors are expected to articulate their willingness and ability to guide students through the research process; explain the degree of independence that the students will have in their research projects; and comment on the students' abilities to complete projects or present work in progress three weeks before the week of final exams in the spring semester of the academic year that the grant is awarded.
- The student should provide the following contact information: name, address, telephone number(s), and e-mail address.

I (THE STUDENT) CERTIFY THAT THE ABOVE INFORMATION IS ACCURATE AND COMPLETE. IF MY APPLICATION IS APPROVED, I AGREE TO ABIDE BY THE POLICIES, RULES, AND REGULATIONS OF THE UNIVERSITY AND THE OFFICE OF STUDENT RESEARCH AT IUPUC.
